## Communication Devices, Inc. Expands

Boonton, New Jersey (April 20th, 2009- Communication Devices, Inc. the most trusted name in Secure Out-of-Band Management technology has completed the move of its operation to Boonton, NJ, in Morris County.

Communication Devices Inc.  
85 Fulton Street  
Boonton, NJ 07005-1912  
Fon: 973-334-1980  
Fax: 973 334-0545

“We have experienced unprecedented growth over the past few years”, says a company spokesman, “creating the need for a larger facility. The Boonton site is more than double our operations and gives us the ability to meet the increased demand for our products”.

CDI’s appliances and software enable service providers, equipment manufacturers, government and military agencies, and corporations to remotely manage, monitor, and secure dial-up ports on their networks. The company offers National Institute of Standards certified security products that enjoy acceptance by all agencies of the Federal Government.

CDI’s partners include: AT&T, Verizon, Sprint, Lockheed Martin, Unisys, Symantec and British Telecom.

CDI has worldwide distribution to ensure quality service for their customers. With over 80,000 devices deployed CDI’s products are currently in use on six continents. To find our more, please visit [www.commdevices.com](http://www.commdevices.com).
